Disclaimer

No license is granted, implied or otherwise, under any patent or patent rights of VIA Technologies. VIA Technologies makes no warranties, implied or otherwise, in regard to this document and to the products described in this document. The information provided in this document is believed to be accurate and reliable as of the publication date of this document. However, VIA Technologies assumes no responsibility for the use or misuse of the information (including use or connection of extra device/equipment/add-on card) in this document and for any patent infringements that may arise from the use of this document. The information and product specifications within this document are subject to change at any time, without notice and without obligation to notify any person of such change.

VIA Technologies, Inc. reserves the right to make changes to the products described in this manual at any time without prior notice.

Regulatory Compliance

FCC-A Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his personal expense.

Notice 1

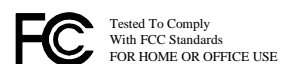

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notice 2

Shielded interface cables and A.C. power cord, if any, must be used in order to comply with the emission limits.

Notice 3

The product described in this document is designed for general use, VIA Technologies assumes no responsibility for the conflicts or damages arising from incompatibility of the product. Check compatibility issue with your local sales representatives before placing an order.

Battery Recycling and Disposal

- Only use the appropriate battery specified for this product.
- Do not re-use, recharge, or reheat an old battery.
- Do not attempt to force open the battery.
- Do not discard used batteries with regular trash.
- Discard used batteries according to local regulations.

Safety Precautions

- Always read the safety instructions carefully.
- Keep this User's Manual for future reference.
- All cautions and warnings on the equipment should be noted.
- Keep this equipment away from humidity.
- Lay this equipment on a reliable flat surface before setting it up.
- Make sure the voltage of the power source and adjust properly 110/220V before connecting the equipment to the power inlet.
- Place the power cord in such a way that people cannot step on it.
- Always unplug the power cord before inserting any add-on card or module.
- If any of the following situations arises, get the equipment checked by authorized service personnel:
 - The power cord or plug is damaged.
 - Liquid has penetrated into the equipment.
 - The equipment has been exposed to moisture.
 - The equipment has not worked well or you cannot get it work according to User's Manual.
 - The equipment has dropped and damaged.
 - The equipment has obvious sign of breakage.
- Do not leave this equipment in an environment unconditioned or in a storage temperature above 60°C (140°F). The equipment may be damaged.
- Do not leave this equipment in direct sunlight.
- Never pour any liquid into the opening. Liquid can cause damage or electrical shock.
- Do not place anything over the power cord.
- Do not cover the ventilation holes. The openings on the enclosure protect the equipment from overheating

Packing List

- ENT-610M board
- Ethernet/DC power transmittal cable
- Ethernet/DC Power/Audio converter board
- Audio cable
- DC-in cable

1. Product Overview

The VIA ENT-610M is an all-in-one touch panel starter kit for In-vehicle infotainment and digital applications. It is powered by a 1.0GHz VIA Cortex A9 dual-core SoC with a power efficient graphics processor to create remarkable performance for digital signage applications.

The VIA ENT-610M provides support for extensive connectivity options, including two USB 2.0 ports, one LVDS connector, one PCAP touch-screen connector, two GPIO connectors for system buttons, one 10/100Mbps Ethernet port, and one line-out audio connector.

1.1. Key Features

- 1.0GHz VIA Cortex-A9 dual-core SoC
- Wide input voltage range supporting 9~36V DC-in
- Lockable connectors
- Optional Wi-Fi support
- Optional 10.1" projective capacitive touch screen support

1.2. Product Specifications

- **Processor:**
 - 1.0GHz VIA Cortex-A9 dual-core SoC
- **System Memory:**
 - 512MB DDR3 SDRAM
- **Storage:**
 - 4GB eMMC Flash memory
- **Boot Loader:**
 - 4MB SPI Flash ROM
- **Graphics:**
 - Mali-400 dual processor GPU
 - 2 integrated, independent 3D/2D graphics processing units
 - Graphics engine supporting OpenGL[®] ES 2.0 hardware acceleration
 - Supports MPEG-2, VC-1 and H.264 video decoding up to 1080p
- **LAN:**
 - ASIX AX88772CLF USB to 10/100Mbps Ethernet controller
- **Audio:**
 - VIA VT1603 SPI Audio Codec
- **Touch Screen:**
 - ZEITEC ZET6223WTA Projective capacitive touch screen controller
- **Onboard I/O:**
 - 1 X USB connector for optional USB Wi-Fi module
 - 2 X GPIO connector for system button
 - 1 X LVDS connector
 - 1 X Touch screen interface connector
 - 1 X 10/100Mbps Ethernet connector
 - 1 X Audio connector (supports Line-out)
 - 1 X DC-in connector
- **External I/O:**
 - 1 X USB 2.0 port
 - 1 X Micro SD card slot
- **Operating System:**
 - Android 4.2
- **Power Supply:**
 - 9~36V DC-in
- **Operating Temperature:**
 - 0°C ~ 45°C
- **Operating Humidity:**
 - 0% ~ 90% (relative humidity; non-condensing)
- **Form Factor:**
 - 17.5cm x 12.0cm (6.87"x4.72")

**Note:**

As the operating temperature provided in the specifications is a result of the test performed in VIA's chamber, a number of variables can influence this result. Please note that the working temperature may vary depending on the actual situation and environment. It is highly suggested to execute a solid testing and take all the variables into consideration when building the system. Please ensure that the system runs well under the operating temperature in terms of application.

1.3. Layout Diagram
